Oliver Hersee

+14233312435 | orhersee@gmail.com | https://www.linkedin.com/in/oliver-hersee-a67035322/

Certifications

- CompTia Cysa+ | CompTia Security | CompTia Network+
- ITIL 4 Foundation, Axelos
- Microsoft Certified: Azure Administrator Associate(AZ-104)
- Blue Team Level 1 (BTL1), Security Blue Team

Education

- Higher School Certificate - 2015

Experience

Pomeroy at Whirlpool Plant - Cleveland TN **09/2025 - Present**

Deskside Support Technician / PC Asset Manager

- Managed 100+ HP PCs through lifecycle ensuring accurate documentation in ServiceNow.
- Handled and resolved ~38 tickets monthly ranging from user authentication/access in Google Cloud Workspace, Software malfunctions and hardware failures. Performed system updates
- Created reports and dashboards in ServiceNow and nexthink to provide visibility on SLA tracking and proactive PC fixing to ensure effective IT service management.
- Analyzed and reported on Phishing emails, Performed local Crowdstrike EDR scans and reimaged compromised devices.
- Analyzed and reported on phishing emails, PC hardware /software, printer and docking station troubleshooting using tools such as Nexthink, Tanium, powershell and Active Directory e.g Resolved BSODs and mapped network drives.
- Repaired PCs (Replaced fans, ram and storage) and organized warranty repairs with vendors.
- Developed powershell scripts for automating Active Directory computer and user account administration (Account offboarding, User SMB file transfers, AD computer account deletion pre-imaging for PC reuse).

Starnet Technologies - Chattanooga TN **02/2025 - 03/2025**

Help Desk Technician

- General Microsoft Office 365 SaaS software troubleshooting and tenant administration in Exchange, Sharepoint, Identity, Outlook. Onboarded / Offboarded Entra ID user accounts, WireGuard VPN. Delegating users to mailboxes, Creating / deleting user accounts, Procuring and assigning licenses, researched suitable licenses.
- Usage of Excel / Google sheets for ticket and billing tracking.

Randstad at Whirlpool Call Center - Cleveland TN **05/2025 - 09/2025**

Call Center Representative

- Successfully handled 65+ customer interactions daily with an average handle time of 8 minutes troubleshooting appliance issues and scheduling service.
- Saved the company $28,000 per month by troubleshooting appliances over the phone, successfully resolving issues without requiring a technician visit.

- Built strong rapport with customers, turning challenging situations into positive experiences and earning repeat business.
- Ensured all communications complied with regulatory standards, including proper documentation of calls and adherence to legal disclosure requirements.

Freelance **2020 — 2025**

Social Media Manager/ Video Editor/ Graphic Designer

- Managed post-production tasks, including video sequencing, adding effects, and fine-tuning footage to enhance viewer engagement and retention with adobe cloud software e.g Adobe Photoshop, Adobe Premiere Pro
- Edited and produced high-quality video content, ensuring seamless transitions, color correction, and audio synchronization across multiple platforms.

Technical Skills

- SIEM & Log Analysis: Splunjk, KQl (Azure Log Analytics), Wireshark, tcpdump, syslog, windows event vewer
- Endpoint & IT Operations: Tanium, Nexthink, ServiceNow, Active Directory, Crowdstrike EDR, Powershell, Bash.
- Vulnerability & Forensics: Autopsy, NetworkMiner, Registry Hive Parsing, Zimmerman Tools, IDA Pro
- Security & Cloud: Azure (VMs, Key Vaults, Identity), Nist 800-53

Projects

TryHackMe CTFs and Learner Pathways: 2025 - 2026

- Successfully became top 1% at TryHackMe demonstrating junior level ability in Blue teaming Log correlation, Digital Forensics, Incident Response & Soc Triage and Red teaming: Network Reconnaissance, OWASP top 10 Web application pentesting, Metasploit, Privilege escalation and active directory enumeration. Understanding both SOC analysts and Penetration testing skillsets helps me understand where security starts and stops, how to address gaps and remediate vulnerabilities.
- SOC simulator: Triaged simulated alert queues and correlated log sources to determine true positives from false positives. Delivered in depth case report on all alerts while ensuring low Mean Time To Respond. Alerts ranged from Phishing emails, anomalous CLI execution, c2 beaconing, process hollowing and credential harvesting.
- Manual Log Stitching: Leveraged Splunk SIEM across Web, Network, EDR, EventViewer, Syslog logs and tcpdump/Wireshark PCAPs to build a timeline and map detected IOCs to cyber kill chain phases such as Nmap Ping scans, Hydra Login page brute forcing, Cobalt Strike c2 beaconing and SQL injection attacks.
- Digital Forensics: Utilized Autopsy and network miner to parse through Windows Registry Hives for evidence of tool execution, user account enumeration and initial access vectors.
- Conducted credential vulnerability scans using Nessus and OpenVas across simulated lab environments to identify misconfigurations, unpatched software and exposed services.
- Red Teaming: Researched Proof of Concepts and exploited them via Brute forcing logins, cracked NTLM hashes using hashcat / John the ripper, Installed Bind/reverse shells, used GTFO bins to research and execute on privilege escalation weaknesses, Performed IDOR, XSS, CSRF and SSRF exploits in browser. Evaded firewalls and Snort IDS/IPS through Nmap Reconnaissance.

Purple Team Threat Simulation: *2025 - 2026*

- Engineered a vulnerable web application testing environment (DVWA, MariaDB, PHP) to simulate active cyberattacks using a virtualized Kali Linux box, Nmap, Burp suite and OWASP ZAP; mirrored 100% of attack traffic via a configured HTTP network **SPAN port** to a secondary analysis node for deep-packet inspection using **Wireshark** and **tcpdump**. Demonstrated exploitability of known web applications (OWASP top 10) within a controlled environment per AU-12 and 6. Audited NGINX web logs for attacker payloads
- Hardened devices according to CIS Benchmarks and NIST 800-53 standards per SI-4: System Monitoring and e.g Locked down root account,

Azure Cloud Environment Deployments: *2026*

- Deployed and automated secure Azure architectures through Infrastructure as Code via VMs, Storage accounts, Key Vaults with network segmentation, least-privilege access and compliance driven configuration. Configured Azure Monitor and Log Analytics workspaces for log ingestion, indexing and analysis performed via Kusto Query Language.

Malware Analysis Lab - 2025

- Built an isolated virtualbox lab with FlareVM for static and dynamic malware analysis. Utilized PEstudio, sysinternals suite, IDA Pro and Ghidra to examine disassembled malware in assembly code to identify anti-debugging and evasion mechanisms, file encryption and behaviours relevant to ransomware detection.

DNS Sinkholing and Vulnerability management *2026*

- Imaged, configured, and deployed a Pi-hole DNS server utilizing verified threat intelligence feeds to block malicious domains at the network level; engineered a custom sinkhole to safely redirect internal users away from malicious URLs to a secure landing page. Researched methods of remediating CVEs and employed cronjobs for automated remediation.

Technical Director of Congregation Services (Volunteer), 03/2024 —
Current **MTOI - Messianic Congregation** — Cleveland, United States

- Managed a team of 4 camera operators and 1 video switcher for 10 hrs weekly during live production services streamed to YouTube and rumble.
- Researched camera functionality and configured features to support volunteer camera operators for ease of use, boosting consistency of video quality.
- Coordinated live communication with camera operators to ensure proper focus, framing, and consistent video quality throughout live-streamed events.
- Collaborated with supervisors and implemented shot ideas for better shot varieties.
